FOR IMMEDIATE RELEASE

Groundbreaking held for "The Confluence at Harvest Hills" Apartments

(Williston, ND) Groundbreaking was held today for a 270 unit apartment complex within the community of HARVEST HILLS in Williston, North Dakota, a Granite Peaks Development.

THE CONFLUENCE AT HARVEST HILLS will have a mix of (60) one bedroom, (90) two bedroom and (120) three bedroom apartments. In addition there will be a community clubhouse for leisurely activities.

The project is located on the south end of the Harvest Hills subdivision on 26th Street West in Williston and just west of the municipal golf course road.

"Williston is a city with a future and we are really excited to do our part to help it grow," said E. J. Olbright, Managing Member of Aerie Development Group, LLC, the project developer; and CEO of CFC Construction, the builder of the project.

"This project is a win-win for America, Williston, families and our company," says Olbright. "We believe that "The Confluence" is a very fitting name--as we believe that in the long term we can help to make Williston a better place for all of us."

"The discovery of oil in the Bakken Formation provides such an opportunity for this country to create jobs, lower our dependence on foreign oil, improve our balance of trade and to encourage investment in our country," says Olbright.

"Construction will commence shortly with construction techniques we have developed in mountain villages of Colorado that have many of the same weather challenges that North Dakotans face," says Olbright.

Granite Peak Development of Casper, Cheyenne and Williston is the land developer for the Harvest Hills subdivision.

Denver, Colorado based OZ Architects have been retained to do the design and Sanderson Stewart Engineering, headquartered in Billings, Montana has been hired to do the civil engineering of the project. A late Summer 2012 completion date is anticipated.
